The Perio-Ortho Synergy

The philosophy of the Perio Master Clinic is to improve the skills and vision of clinicians with the latest and most effective clinical techniques based on sound scientific principles in periodontology, implant and orthodontic dentistry. As the speakers and delegates will focus on advanced techniques from a practical, useful point of view this fifth edition of Perio Master Clinic will provide your organization with an ideal platform to show off your latest products and materials for this unique area of dentistry.

Our programme will focus on a multidisciplinary combined periodontal and orthodontic treatment approach, workshops on the day preceding the conference's regular sessions will be organized given the success of this hands on sessions during the last Perio Master Clinic in Dublin 2020. The workshops create an opportunity for sponsorship in the area of equipment, hand instrumentation and biomaterials.

Our scientific programme has confirmed an outstanding list of speakers from Europe, the US and Latin America, all leading experts in their field, so the delegates will definitely feel highly motivated and eager to know more about your products available in the most exciting area of dentistry today and aiming for a predictable, aesthetic and long-lasting treatment outcome in complex patients.
